

Press Release – May 2005

## **The End of the line!**

... is a long way of with Fisco's new heavy duty Road-Line – there's 30m of double braided cotton line and over 330g of chalk powder. Recently introduced, this robust marking tool makes an ideal addition to Fiscos' existing chalk line range.

The Road-Lines vital statistics and practical design means that this chalk-line is ideally suited to marking out larger areas: car parking spaces - land & fence boundaries - on-site positioning, - sports fields etc. And of course, its usefulness is not just limited to the professional trades people; anyone who needs to mark out large areas, from time-to-time, will find Road-Line a practical aid.

The extra thick braided cord combined with Fisco's extra high quality superfine chalk powder gives a really strong, highly visible line, resistant to rubbing off, even on rough surfaces. The superfine chalk comes ready to fit in a screw-in cartridge so there is no messy pouring to contend with.

Features include a quick change (chalk powder) refill facility, anti-wear line guide (galvanised steel), a lockable (nickel steel) handle and to ensure high on-site visibility, a bright yellow ABS case, ruggedly constructed to withstand the rigours of heavy on site use.

The Road-Line complements a comprehensive range of high quality chalk line reels offered by Fisco all professionally designed to cover a wide range of applications and budgets.
